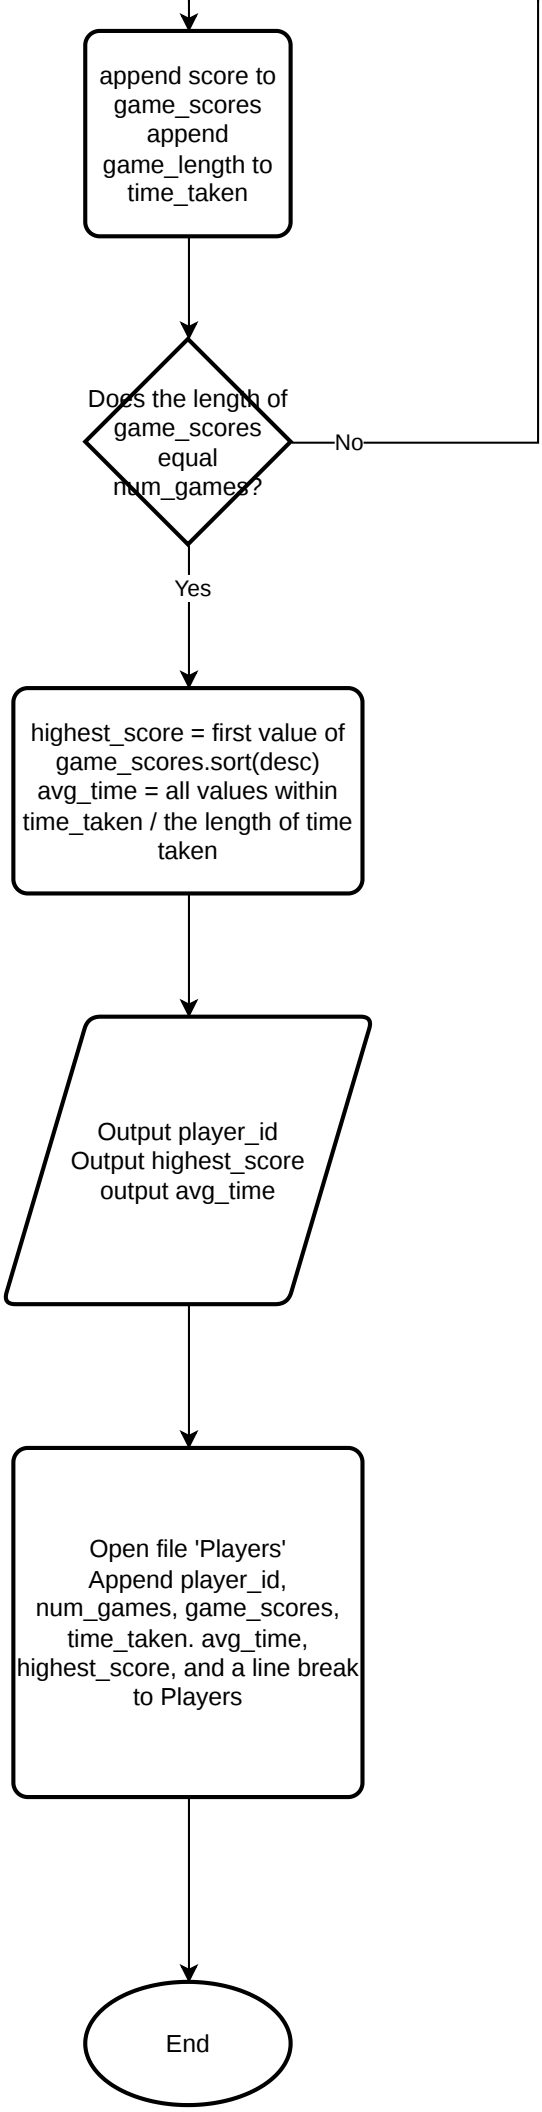
Start
Define player_id as string
define num_games as string
define game_scores as array
define time_taken as array
define loop_counter as integer
Input player_id
Input num_games
Output "number of games needs to be below 5 or above 10, please try again"
is num_games is below 5 or above 10
Yes
No
input score
Output "Game length needs to be above or equal to 5 minutes or below or equal to 60 minutes.
input game_length in minutes
is game_length =< 5 minutes or is gamelength >= 60 mins
Yes
No



append score to game_scores append game_length to time_taken
Does the length of game_scores equal num_games?
No
Yes
highest_score = first value of game_scores.sort(desc) avg_time = all values within time_taken / the length of time taken
Output player_id Output highest_score output avg_time
Open file 'Players' Append player_id, num_games, game_scores, time_taken. avg_time, highest_score, and a line break to Players
End
